

Online Web Portal Information

TAZ Holdings is pleased to announce a new option to pay your invoices online!

If you are billed by more than one of our companies, you will need to create a username and login per company. To help keep track of your individual accounts, we highly recommend you set your username with the company you're logging into first.

For example: **Economy**Username
MBLUsername
ARCUsername
TAZUsername
EdgeUsername

Please click the link below and register by clicking "Register Here". You will need **BOTH** your account number and recent invoice number to register.

[Portal - Sign In \(onlineportal.us.com\)](http://onlineportal.us.com)

Should you have more than one account number you will then need to "Link" all other accounts by going to "My Profile" and clicking "Manage Linked Accounts" (see attached images).

To link your accounts, you will need the account number and an invoice number (*please disregard any error messages and use the overview drop down to see if the account has been linked*).

Each individual job address will have its own account number! Upon receiving your first invoice for a new job, you will need to link that job to your online account to have it populate in the drop down. You only need to link the initial invoice for a new job!

Since this system currently only allows payments towards accounts and not individual invoices, you may send emailed remittances of how you would like any lump sum payments to be applied across multiple accounts to accounting@tazrecycling.com.

If you have ANY questions, please do not hesitate to ask!

Best Regards,

Michelle Sikorski
